Chapter 1

LabView Basics

1.1 Introduction

LabVIEW (short for **Lab**oratory **V**irtual **I**nstrumentation **E**ngineering **W**orkbench) is a development environment for visual programming, developed by National Instruments (www.ni.com). The code files (or program files) are identified by the .vi extension called **Virtual Instruments** or **VIs** for short. This graphical language is most commonly used for data acquisition, instrument control, signal processing (analysis), industrial automation, and more.

The next section will cover some basics of LabVIEW design and operation. For additional resources, the current (2013) LabVIEW Getting Started Manual is located here.

1.1.1 Additional Resources

[1]

Chapter 2

Theory of Operation

Define the background concepts of how/what this program is accomplishing. Make refs to papers but don't do the math here (don't have time for that). Just outline the basics of what we want to do, what goes into the system, what the system does (ref manuals and such for theory & papers), and what the system outputs.

Chapter 3

Code Structure

Theory of code operation goes here. ie case structure, state machine,

3.1 Main VI

Define the outline of the Main VI (the main program) and hit on each part of it. Don't spend time explaining the subvi's here since i'm doing that in the **Custom VI's** section. Make sure to be thorough on all the code that is not included in the subvi section.

The main program **ASUDS_v13.vi** is contained within a Project file called (file name here).

3.2 Custom VI's

List of custom VI's and a short description of what they do. In the next section we will take a deeper look into each of these subvi's.

3.3 Operation

| Oscilloscope | | | |
|---|------------------------------|---|--|
| * | | | |
| VI | File Name | Description | |
| ₹"7 □ 2014 | LC931C_Read.vi | Load Oscilloscope Setting from System Generated File | |
| ₹ [™] 7 🖈 🔯 2014 (************************************ | LC931C_Int.vi | Initialize Oscilloscope Settings | |
| ₹"7 🖈 🔼 2014 | LC931C_settings.vi | Apply Settings to Oscilloscope | |
| (⁶ 7) ■ 2014 (10) (1 | LC931C_single-wave-output.vi | Acquire Single Wave from Oscilloscope and Average | |
| ⟨ [™] ⟩ | LC931C_norm-pad-hilbert.vi | Oscilloscope Tab Settings | |
| ξ ^{fh} γ ⇒ 1 2014 Close | LC931C-Config-Write-Close.vi | Write Oscilloscope settings to System File and close Oscillo- scope resources | |

Table 3.1: Oscilloscope Custom VI's

| JSR Pulser/Receiver | | | |
|--|------------------------------|---|--|
| VI | File Name | Description | |
| ₹"7 ➡ 🔄 2014 | DPR300_Read.vi | Load Pulser/Receiver Setting from System Generated File | |
| ₹ ⁰ 7 ➡ 1 2014 | DPR300_Int.vi | Initialize Pulser/Receiver Settings | |
| ₹ [™] 7 → 1 2014 | DPR300_settings.vi | Apply Settings to Pulser/Receiver | |
| E th ? DPR200 Close Write | DPR300-Config-Write-Close.vi | Write Pulser/Receiver settings to System File and close Pulser/Receiver resources | |

Table 3.2: JSR Pulser/Receiver Custom VI's

| Ultrasonic Package | | | |
|---|------------------------------|---|--|
| VI | File Name | Description | |
| € th 7 D-Sanic A Scan Config | USonic-A-Scan-Config-edit.vi | Configure/Set Gates for Data Acquisition | |
| ₹ ^m 7 ➡ | USonic-Gates-edit.vi | Pull Out Relevant Data from Gates for Data Acquisition | |
| ₹ [®] 7 ➡ 2 2014 | USonic-FFT.vi | Process Gate For Quick Analysis | |

Table 3.3: Ultrasonic A-Scan Customized Package VI's

| Math | | | |
|----------------------------------|--------------------------|---|--|
| VI | File Name | Description | |
| ₹ ⁷ 7 ➡ 🔁 2014 | Waveform-to-XY-Array.vi | Convert Waveform to XY-Array | |
| ₹ [®] 7 ➡ 2 2014 | Filter_signal.vi | Filter Wave Signal for Oscilloscope Tab (does not affect Data Acquisition) | |
| ⟨ ⁰ ⟩ | Average-Dynamic-Array.vi | Take the Average of N elements in a Dynamic Array | |
| ₹%7 → 12 2014 | FWHM-Poly.vi | Compute the Full Width Half Max (FWHM) of either a Wave- form, XY-Graph, or Waveform cluster | |

Table 3.4: Custom Math VI's

| Miscellaneous | | | |
|---|-----------------------------|---|--|
| VI | File Name | Description | |
| ₹ [®] 7 🖈 🌇 2014 Save Config File | Save-User-Config-File.vi | Save all front panel controls to a user.ini settings file | |
| ₹ th 7 2014 Load User Config File | Load-User-Config-File.vi | Load the user.ini settings file | |
| ₹ ¹⁷ 7 🖈 🍱 2014 | Time-Data.vi | Load and Save Data Timing table | |
| €77 2014 | Instrument-error-handler.vi | Pop-up error message for loss of Instrument signal | |

Table 3.5: Miscellaneous Custom VI's
